# Precision 3D printing. Easy as F123.

More reliable, more affordable,  
more productive rapid prototyping  
and manufacturing than ever before.

## More speed. More productivity.

F123 Series 3D printers give designers, engineers and educators access to affordable, industrial-grade 3D printing. Work faster through concept iterations and component verification. Make jigs, fixtures and manufacturing tools faster, with strong, stiff materials. Increase productivity and reach your goals sooner with repeatable results.

## Smoother workflow. Quieter workspace.

F123 3D printers are designed for supreme ease of use and a more streamlined workflow, working seamlessly with the design-to-print GrabCAD Print™ software. They provide the reliability and simplicity needed in a 3D printing platform to refine designs. This can be done within the work space, thanks to clean, quiet, safety-certified printers.

## Data protection. When you need it.

Safeguard your 3D printing data with Stratasys ProtectAM™. Available on the F370, ProtectAM technology provides data security, including U.S. Department of Defense STIG compliance, for ongoing security of information processing.

## Elastomer

Print large, complex elastomer parts with the F170™, F270™ and F370™ printers.

**30 years of expertise.**  
**100,000 hours of testing.**  
**Only one F123 Series.**

For companies and schools new to 3D printing and established users alike, Stratasys F123 3D printers are the game-changing choice, with the highest levels of plug-and-print reliability and repeatable accuracy.

## More choices. More possibilities.

From the affordable F120™ through the versatile F370, the choices available with F123 Series printers are unmatched. Work with a wide range of materials including carbon fiber ABS and elastomer\*. Achieve complex geometries and interlocking components with our unique soluble support material. However intricate the part, the soluble support dissolves to leave a pristine finish, requiring no hands-on removal.

\*Not available on the F120.

<sup>1</sup> Not available on the F120

<sup>2</sup> Accuracy is geometry-dependent. Achievable accuracy specification derived from statistical data at 95% dimensional yield. Z part accuracy includes an additional tolerance of -0.000/+slice height.

<sup>3</sup> PLA and Diran 410MF07 do not utilize soluble support material. The supports are made of breakaway PLA.

<sup>4</sup> U.S. government agency STIG compliance via Stratasys ProtectAM technology is powered by Red Hat® Enterprise Linux® software.
